The Tyree Foundation Institute of Health Engineering (Tyree IHealthE) is an interdisciplinary hub of healthcare translation that will directly and significantly address both the health needs of our ageing population, and the need for Australia to develop its capacity for innovation.

Membership to Tyree IHealthE offers an opportunity to join a community of researchers, clinicians and research students, with a shared vision to transform healthcare through innovation. Our cross-faculty and interdisciplinary approach will ensure that you have opportunities to connect with researchers and clinicians across all faculties of UNSW, medical research institutes, local health districts and other external partners.

**Membership benefits**

- Consultation and mentoring from leaders in biomedical research and translation
- Access to competitive seed funding for related projects
- Assistance in finding new clinical and research collaborators
- Access to the CIMIT framework, a proven methodology to support translation of research into clinical and commercial solutions
- Engagement opportunities with industry partners
- Professional development in research translation and commercialisation
- Access to core engineering, regulatory, project management and clinical capabilities
- Member communication channels to share and promote news and opportunities
- Early access to events and other opportunities

**As a member we ask you to commit to the following:**

- Acknowledgement of affiliation in outputs relating to your contributions to Tyree IHealthE activities (publications, grants, presentations, media etc.)
- Engagement with reporting on Tyree IHealthE activities against KPIs in annual and donor reports.
